Verify-ED Environmental Policy Statement

Verify-ED strives to conduct all activities in accordance with The Resource Conservation and Recovery Act (RCRA). The policy of Verify-ED is to positively affect the environment by significantly limiting paper waste. This environmental policy is in direct support of our security policy. Paper production increases our exposure to liability; therefore, reducing paper production also reduces our potential liability. We conduct most business activities via secure networks, and we strive to reduce the production of paper in all operational activities.

This policy is implemented throughout day-to-day activities:

- Search requests are submitted online
- Supporting documents are received via secure online fax service in electronic format. These documents are not printed to paper.
- Most invoices are submitted via email
- Marketing materials are presented via our website and email

This environmental policy is implemented by all Verify-ED employees and we seek to establish business relationships with companies that demonstrate supporting environmental ethics.
